MICRONUTRIENTS FOR MACRO YIELDS.[™]

INTRODUCING SUL4R-PLUS[®] ZINC FERTILIZER. THINK ZINC FOR BALANCED PLANT NUTRITION AND BOOSTED YIELDS.

SUL4R-PLUS ZINC fertilizer micronutrient package delivers a potent trio of nutrients – zinc, calcium and sulfur – while making nutrition immediately available to hungry crops.

SUL4R-PLUS ZINC fertilizer is an optimized micronutrient package – with fast-working nutritional power to deliver immediate and complete nutrition to crops during the current growing season for macro yields and improved crop quality. Look at the unsurpassed combination of advantages below.

COMPETITIVE ADVANTAGES:

- Every particle contains zinc, calcium and sulfur so every plant gets fed with efficient nutrition
- Highly dispersible particles provide immediate nutrition to crops. All nutrients are in plant-available form (no waiting), for Right Product, Right Place, Right Rate, Right Time (4Rs)
- Significantly more particles per square foot than competitors – resulting in uniform feeding, higher yields and better crop quality
- Phosphorous-free, for P-sensitive and P-restricted zones
- Provides formulation flexibility, allowing you to provide the correct nutrition for crops without overapplying potassium or phosphorous
- Particle size uniformity minimizes blend segregation for uniform distribution across the field, ensuring plants have better access to nutrients
- Wide spread pattern with excellent spread uniformity, allowing for flexibility to spread 90-120 feet
- Dust-free handling
- Sulfur enhances microbial activity that degrades organic residue in the field

Particle Size Match with High Uniformity Index minimizes blend segregation, allowing for uniform nutrient distribution over the field.

TARGETED CROPS

SUL4R-PLUS ZINC fertilizer is ideal for a wide range of crops that need more zinc for optimum yield and quality, including:

- Barley
- Beans
- Citrus
- Clover
- Corn
- Cotton
- Flax
- Onions
- Peaches
- Pecans
- Potatoes
- Rice
- Sorghum
- Soybeans
- Sudan grass
- Sugar beets
- Sweet corn
- Table beets
- Tomatoes

Note: It is always a best practice to conduct a soil sample and consult your agronomist or extension agent for optimal results.
Excessive use of zinc can cause serious crop injury.

SUL4R-PLUS® ZINC FERTILIZER CRUSHES THE COMPETITION.

**SUL4R-PLUS ZINC Fertilizer
Delivers These Advantages:**

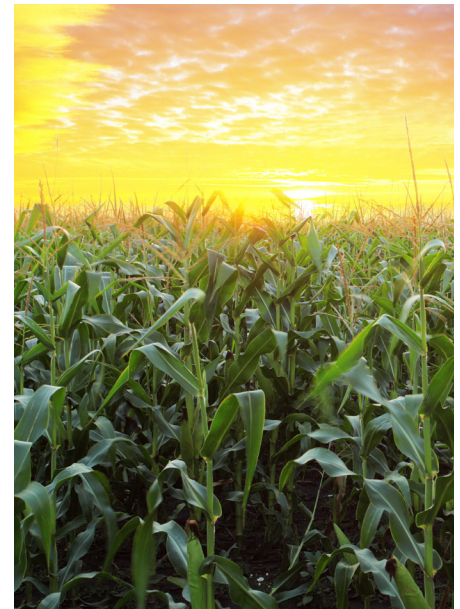

| | Granular Sulfates/Oxysulfates | Enhanced Phosphates | Sulfur Pastilles |
|--|--------------------------------------|--------------------------------------|--------------------------------------|
| Every particle delivers 3 nutrients | Advantage SUL4R-PLUS ZINC fertilizer | | Advantage SUL4R-PLUS ZINC fertilizer |
| Highly dispersible particles | Advantage SUL4R-PLUS ZINC fertilizer | | Advantage SUL4R-PLUS ZINC fertilizer |
| Formulation flexibility | | Advantage SUL4R-PLUS ZINC fertilizer | |
| Minimizes blend segregation | Advantage SUL4R-PLUS ZINC fertilizer | Advantage SUL4R-PLUS ZINC fertilizer | Advantage SUL4R-PLUS ZINC fertilizer |
| Seven to 10 times greater particles per sq. foot | Advantage SUL4R-PLUS ZINC fertilizer | | Advantage SUL4R-PLUS ZINC fertilizer |
| Uniform spread across wide spread pattern | Advantage SUL4R-PLUS ZINC fertilizer | Advantage SUL4R-PLUS ZINC fertilizer | Advantage SUL4R-PLUS ZINC fertilizer |
| Dust-free handling | Advantage SUL4R-PLUS ZINC fertilizer | Advantage SUL4R-PLUS ZINC fertilizer | Advantage SUL4R-PLUS ZINC fertilizer |
| Degrades crop residues | | Advantage SUL4R-PLUS ZINC fertilizer | |

RATE OF APPLICATION

Optimum use rate varies according to crop need. The right amount of zinc can be delivered to the crop without overapplying other nutrients, such as phosphorus.

As the chart below indicates, 67 lbs. of SUL4R-PLUS ZINC fertilizer per acre delivers 2.0 lbs. of zinc, 12.1 lbs. of calcium and 10.7 lbs. of sulfur per acre.

| SUL4R-PLUS ZINC fertilizer | Zinc | Calcium | Sulfur |
|-------------------------------|------------------|------------------|------------------|
| <i>lbs./Acre</i> | <i>lbs./Acre</i> | <i>lbs./Acre</i> | <i>lbs./Acre</i> |
| 50 | 1.5 | 9.0 | 8.0 |
| 67 | 2.0 | 12.1 | 10.7 |
| 100 | 3.0 | 18.0 | 16.0 |
| 200 | 6.0 | 36.0 | 32.0 |
| 333 | 10.0 | 59.9 | 53.3 |
