MICRONUTRIENTS FOR MACRO YIELDS.™

INTRODUCING SUL4R-PLUS® B+Z FERTILIZER TO BALANCE PLANT NUTRITION AND BOOST YIELDS.

SUL4R-PLUS B+Z fertilizer micronutrient package delivers a potent quartet of nutrients – boron, zinc, calcium and sulfur – formulated to make nutrition immediately available to hungry crops.

SUL4R-PLUS B+Z fertilizer is the optimum micronutrient package – with the nutritional power needed to deliver immediate and complete nutrition to crops during the current growing season for macro yields and improved crop quality. Take a look at the unbeatable combination of advantages below.

COMPETITIVE ADVANTAGES:

- Every particle contains boron, zinc, calcium and sulfur, so every plant gets fed with efficient nutrition
- Product solubility provides immediate nutrition to all crops
- All nutrients are in plant-available form (no waiting), for Right Product, Right Place, Right Rate, Right Time (4Rs)
- Significantly more particles per square foot than competitors – resulting in uniform feeding, higher yields and better crop quality
- Phosphorous-free, for P-sensitive and P-restricted zones
- Provides formulation flexibility, allowing you to provide the correct nutrition for crops without overapplying potassium or phosphorous

Uniform particle size ensures the product blends well with urea, DAP, MAP and potash and will spread evenly over the field.

- Flexibility to spread 90-120 feet
- Dust-free handling
- Sulfur enhances microbial activity that degrades organic residue in the field

SUL4R-PLUS® B+Z FERTILIZER DELIVERS THE FOLLOWING ADVANTAGES TO OPTIMIZE ROI.

Every particle delivers 4 nutrients

Formulation flexibility

Highly soluble particles

Minimizes blend segregation

Seven to 10 times greater particles per sq. foot

Dust-free handling

Uniform spread across wide spread pattern

RATE OF APPLICATION

Optimum use rate varies according to crop need. The correct amount of boron and zinc can be delivered to the crop.

As the chart below indicates, 100 lbs. of SUL4R-PLUS B+Z fertilizer per acre delivers .5 lbs. of boron, 1.5 lbs. of zinc, 18 lbs. of calcium and 16 lbs. of sulfur per acre.

SUL4R-PLUS B+Z fertilizer	Boron	Zinc	Calcium	Sulfur
<i>lbs./Acre</i>	<i>lbs./Acre</i>	<i>lbs./Acre</i>	<i>lbs./Acre</i>	<i>lbs./Acre</i>
100	0.5	1.5	18.0	16.0
200	1.0	3.0	36.0	32.0
