MICRONUTRIENTS FOR MACRO YIELDS.™

**INTRODUCING SUL4R-PLUS[®] ZINC FERTILIZER.
THINK ZINC FOR BALANCED PLANT NUTRITION
AND BOOSTED YIELDS.**

SUL4R-PLUS ZINC fertilizer micronutrient package delivers a potent trio of nutrients – Zinc, Calcium and Sulfur – formulated to make nutrition immediately available to hungry crops.

COMPETITIVE ADVANTAGES:

- Every granule contains Zinc, Calcium and Sulfur, so every plant gets fed with efficient nutrition
- Product solubility provides immediate nutrition to all crops
- All nutrients are in plant-available form (no waiting), for Right Product, Right Place, Right Rate, Right Time (4Rs)
- 40-50 granules per square foot (based on 100 lbs/acre application rate) - resulting in uniform feeding
- Phosphorus-free, for P-sensitive and P-restricted zones
- Provides formulation flexibility, allowing you to provide the correct nutrition for crops without overapplying Potassium or Phosphorus
- Leaching characteristics best mimic the nutrient uptake curves of most crops during the growing season and indicate it is a superior source of Sulfate-Sulfur for fall application

Uniform granule size ensures the product blends well with Urea, DAP, MAP and Potash and will spread evenly over the field.

- Flexibility to spread 90-120 feet
- Dust-free handling
- Sulfur enhances microbial activity that degrades organic residue in the field
- Low salt index less than 8
