

CONTRIBUTION TO AGRONOMIC SUSTAINABILITY

INCREASE CROP PRODUCTIVITY

- Reduces production cost
- Makes food more affordable

NUTRIENT MANAGEMENT

- Increases nutrient efficiency
- Complexes with micronutrients for season-long availability

INTEGRATED PLANT DEFENSE

- Optimizes natural plant defense systems with Calcium, Sulfate and Boron
- Lignosulfonate reduces soil pest such as Nematodes

WATER QUALITY/WETLANDS

- Aids nutrient retention for soil
- Provides water optimization for the plant

SOIL CONSERVATION

- In row application achieving two of the 4Rs: right place, right time
- Soil amendment benefits allow water to infiltrate and hold nutrients in the soil

Reduces Manufacturing Footprint ON THE ENVIRONMENT

- SUL4R-PLUS products utilize 99% recycled materials
- Saves natural resources

SUL4R-PLUS® products have Sustainability built into our Mission (4Rs).
